Yogesh Venkataramanan

Software Engineer | Cloud and Full-Stack | Enterprise Platforms

Aubrey, TX | 313-367-8506 | yogeshvenkat21@gmail.com | linkedin.com/in/yogeshvenkat21 | github.com/Yogesh21v | yogesh21v.github.io

SUMMARY

Software engineer whose path runs from electronics and embedded hardware, up through cloud and full-stack development, to production business systems. Experience spans a multi-tenant staffing platform running in production and a battery-analytics dashboard on live hardware data; projects cover a crowd-shipping app, AWS serverless and retrieval; platform skills include ServiceNow and Workday.

EXPERIENCE

Junior Software Engineer Intern, NowforceAI

JUL 2026 – PRESENT

Aubrey, TX (Remote) · Node.js, Express, MySQL, JavaScript, Stripe, Playwright

- Built HireYT (hireyt.com), a multi-tenant, AI-native applicant-tracking platform that takes a staffing agency from sourcing to placement to billing, with role-based access for admins, recruiters, sales, clients and candidates.
- Covered submittals, interviews, offers, placements and timesheets with approval workflows, plus a finance module (parties, items, sales, purchases, cash and bank, salary tracking) with P&L, day-book and party-statement reports.
- Modeled records the ServiceNow way on interconnected MySQL tables: every record has a state (draft, submitted, approved, rejected, correction), access follows roles, each tenant's data is isolated, and actions leave an audit trail.
- Added a candidate portal (resume parsing, skills-based matching, profile-completeness gate, topic-filtered community feed, messaging) and AI features: candidate insights, an insights assistant and an inter-agency job marketplace.
- Shipped through a dev/prod split deployed over SSH, with Playwright browser tests that caught real bugs (blank tabs, PDF parsing failures) and a fix for UPDATE statements silently failing in production.

R&D Intern, Imagine Marketing Services Pvt. Ltd. (boAt)

JAN 2024 – MAY 2024

Bangalore, India

- Built a Python framework and Flask dashboard that estimates device battery health from real-time telemetry, integrated with embedded hardware for live data acquisition.
- Implemented an ML classification pipeline that labels battery health status, supporting proactive diagnostics and reducing manual analysis.

PROJECTS

HandCarry, Crowd-Shipping Platform (Web + Android)

IN DEVELOPMENT

React, Vite, Node.js, Express, MySQL, Capacitor, Docker, GitHub Actions · live beta

- Building a marketplace where senders ship parcels with verified travellers who hand-carry them between countries, with a 5-step send wizard, live price quotes and customs and prohibited-item screening.
- Designed a REST API on a 25-table MySQL schema, with a query-translation layer that ported the backend from PostgreSQL to MySQL without rewriting every route.
- Secured it with rotating JWT refresh tokens, TOTP two-factor login, AES-256-GCM encrypted KYC documents and an audit log; packaged a signed Android build (APK and AAB) with biometric lock, tested with 12 API tests and Playwright.

ShaktiConnect, Full-Stack Community Platform

MAY 2026 – AUG 2026

Node.js, Express.js, MongoDB, JWT, REST APIs, Playwright · github.com/Yogesh21v/shakti-platform

- Built a community forum, member directory and resource center from scratch on a custom REST API, MongoDB and JWT authentication.
- Added live voting, threaded replies, search and secure sessions; validated every workflow with Playwright end-to-end tests before a free-tier deployment.

Soccer Concierge Chatbot, AWS Serverless

SEP 2025 – DEC 2025

AWS Lambda, API Gateway, DynamoDB, SNS/SQS, CloudWatch · github.com/Yogesh21v/goalpost-chatbot

- Architected a serverless chatbot answering natural-language questions on live scores, fixtures and standings, with intent routing, entity normalization and fallbacks over third-party APIs.
- Persisted conversations in DynamoDB, decoupled processing with SNS/SQS and monitored the pipeline in CloudWatch.

Software Engineer | Cloud and Full-Stack | Enterprise Platforms

SmartDoor, Face Recognition Access System

SEP 2025 – DEC 2025

AWS Rekognition, Kinesis Video Streams, Lambda, DynamoDB, IAM, SNS · github.com/Yogesh21v/smartdoor

- Designed a serverless access-control system that identifies visitors in real time with Rekognition and Kinesis Video Streams.
- Built time-limited OTP authentication on Lambda and DynamoDB TTL, with SNS alerts and least-privilege IAM roles across all APIs.

News Article Retrieval Engine, Bayesian Network

JAN 2025 – APR 2025

Python, Bayesian Inference, Information Retrieval, NLP · github.com/Yogesh21v/news-retrieval-system

- Built a probabilistic retrieval engine that ranks relevant articles from a large news-headline corpus, with a Python query, inference and ranking pipeline.
- Benchmarked with precision, recall and Mean Average Precision, iterating to improve relevance.

SKILLS

Enterprise Platforms	ServiceNow (ITSM, User Access Management, Roles and ACLs, Reports and Dashboards, Tables and Fields, Forms, Notifications, Service Catalog, Knowledge Management, Update Sets); Workday (Reporting)
Languages	Java, Python, JavaScript, C++, SQL
Frameworks	Spring Boot, Spring Framework, Hibernate, JDBC, Servlets/JSP, Node.js, Express.js, React.js, Vite, Capacitor, REST APIs, Microservices
Databases	MongoDB, MySQL, DynamoDB
AWS	ECS Fargate, ECR, EC2, S3, Lambda, API Gateway, DynamoDB, RDS PostgreSQL, VPC and security groups, Application Load Balancer, ACM, IAM, Secrets Manager, Systems Manager Parameter Store, SES, SNS/SQS, CloudWatch Logs, Rekognition, Kinesis Video Streams, Budgets and Cost Explorer
DevOps	Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Linux
Tools and Testing	Git, JUnit, Playwright, Maven/Gradle, Postman, Stripe; AI-assisted development (Claude)
Core CS	Data Structures and Algorithms, Object-Oriented Design, System Design

EDUCATION

M.S. Computer and Information Science
University of Michigan, Dearborn
Sep 2024 – May 2026 | GPA 3.94 / 4.0
Computer Networks, Advanced Operating Systems, Cloud Computing

B.E. Electronics and Communication
Sri Venkateswara College of Engineering, Anna University
Aug 2020 – May 2024 | GPA 8.23 / 10
Object-Oriented Programming, Data Structures

CERTIFICATIONS

The Joy of Computing using Python
NPTEL | Jan – Apr 2023

Programming in Java
NPTEL | Jul – Dec 2023

WORK FOCUS

- Full-stack web (3)
- Cloud serverless (2)
- ML and data (2)
