Yogesh Venkataramanan

Software Engineer | Application Development | ServiceNow | Workday

Aubrey, TX | 313-367-8506 | yogeshvenkat21@gmail.com | linkedin.com/in/yogeshvenkat21 | github.com/Yogesh21v | yogesh21v.github.io

SUMMARY

Software engineer who builds full-stack and cloud applications, then brings enterprise-platform thinking to them: ServiceNow (access management, reports and dashboards, ITSM) and, more recently, Workday reporting. I turn messy business workflows into secure, tested products, from a staffing platform in production to a healthcare billing platform on AWS.

8	3	2	3.94
builds across web, cloud and ML	products live or in beta	enterprise platforms: ServiceNow, Workday	GPA in my M.S. (out of 4.0)

EXPERIENCE

Junior Software Engineer Intern, NowforceAI

JUL 2026 – PRESENT

Aubrey, TX (Remote)

HireYT, AI-native applicant-tracking platform

One system for staffing agencies, from sourcing to placement to billing.

Node.js, Express, MySQL, JavaScript, Stripe, Playwright · hireyt.com

- Built a multi-tenant platform with 5 user roles (admins, recruiters, sales, clients, candidates) and approval workflows for submittals, timesheets and placements.
- Applied ServiceNow design habits: 5 record states from draft to correction, role-based access, tenant isolation, audit trail, SLA deadlines, tasks and notifications.
- Shipped a finance module with 3 reports (P&L, day-book, party statements) and a candidate portal with resume parsing, skills matching and AI insights.
- Released through a dev/prod split with Playwright tests that caught real bugs, including UPDATE statements silently failing.

Healthcare Billing Intelligence Platform

Shows a clinic every claim, denial and unpaid dollar, with a clear next step for each.

React, TypeScript, Node.js, PostgreSQL, AWS ECS Fargate, RDS, SES, Secrets Manager, Playwright

- Took it from prototype to a live HTTPS site on AWS, with a private database, a load balancer and managed secrets.
- Designed the data model around 6 user roles, with authenticator-app sign-in, an audit log and a self-erasing public demo.
- Built reliable email (retries, row locking, signed bounce handling) and self-service password and authenticator resets.
- Verified with automated server and browser test suites, full-site sweeps and phone-size audits, so every screen holds up on mobile.

R&D Intern, Imagine Marketing Services Pvt. Ltd. (boAt)

JAN 2024 – MAY 2024

Bangalore, India · Python, Flask, ML classification, embedded hardware

Turning raw battery telemetry into proactive diagnostics.

- Built a Python and Flask dashboard that estimates device battery health from real-time telemetry on embedded hardware.
- Added an ML classifier for battery health status, reducing manual analysis.

PROJECTS

HandCarry, Crowd-Shipping Platform (Web + Android)

IN DEVELOPMENT

React, Vite, Node.js, MySQL, Capacitor, Docker, GitHub Actions · live beta

Senders ship parcels with verified travellers who hand-carry them between countries.

- Built a 5-step send wizard with live price quotes and customs and prohibited-item screening.
- Wrote a query-translation layer that ported the backend from PostgreSQL to MySQL without rewriting every route.
- Secured with rotating JWT tokens, TOTP two-factor and AES-256-GCM encrypted KYC documents; shipped a signed Android build covered by automated API and Playwright tests.

Yogesh Venkataramanan

Software Engineer | Application Development | ServiceNow | Workday

ShaktiConnect, Full-Stack Community Platform
MAY 2026 – AUG 2026

Node.js, Express.js, MongoDB, JWT, Playwright · github.com/Yogesh21v/shakti-platform

One place for a community's forum, member directory and resources.

- Built 3 modules (forum, member directory, resource center) on a custom REST API with JWT authentication.
- Added live voting, threaded replies and search; every workflow passed Playwright end-to-end tests before a free-tier deployment.

Soccer Concierge Chatbot, AWS Serverless
SEP 2025 – DEC 2025

AWS Lambda, API Gateway, DynamoDB, SNS/SQS, CloudWatch · github.com/Yogesh21v/goalpost-chatbot

Live scores, fixtures and standings, answered in plain language.

- Built intent routing, entity normalization and fallbacks over third-party sports APIs.
- Stored conversations in DynamoDB, decoupled work with SNS/SQS and monitored the pipeline in CloudWatch.

SmartDoor, Face Recognition Access System
SEP 2025 – DEC 2025

AWS Rekognition, Kinesis Video Streams, Lambda, DynamoDB, IAM, SNS · github.com/Yogesh21v/smartdoor

Real-time face recognition for door access, with credentials that expire on their own.

- Identified visitors live with Rekognition on Kinesis Video Streams; time-limited OTPs expire through DynamoDB TTL, with SNS alerts.
- Enforced least-privilege IAM roles across every API and service.

News Article Retrieval Engine, Bayesian Network
JAN 2025 – APR 2025

Python, Bayesian Inference, Information Retrieval, NLP · github.com/Yogesh21v/news-retrieval-system

Ranking the right article out of a large headline corpus.

- Built the query, inference and ranking pipeline on a Bayesian Network in Python.
- Benchmarked on 3 metrics (precision, recall, MAP) and tuned for relevance.

SKILLS

Enterprise Platforms	ServiceNow (ITSM, User Access Management, Roles and ACLs, Reports and Dashboards, Tables and Fields, Forms, Notifications, Service Catalog, Knowledge Management, Update Sets); Workday (Reporting, recent)
AI Development	LLM-powered features (resume parsing, insights assistant); AI pair-programming with Claude
Languages	Java, Python, JavaScript, C++, SQL
Frameworks	Spring Boot, Spring Framework, Hibernate, JDBC, Servlets/JSP, Node.js, Express.js, React.js, Vite, Capacitor, REST APIs, Microservices
Databases	MongoDB, MySQL, DynamoDB
AWS	ECS Fargate, ECR, EC2, S3, Lambda, API Gateway, DynamoDB, RDS PostgreSQL, VPC and security groups, Application Load Balancer, ACM, IAM, Secrets Manager, Systems Manager Parameter Store, SES, SNS/SQS, CloudWatch Logs, Rekognition, Kinesis Video Streams, Budgets and Cost Explorer
DevOps	Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Linux
Tools and Testing	Git, JUnit, Playwright, Maven/Gradle, Postman, Stripe
Core CS	Data Structures and Algorithms, Object-Oriented Design, System Design

EDUCATION

M.S. Computer and Information Science
University of Michigan, Dearborn
Sep 2024 – May 2026 | GPA 3.94 / 4.0
Computer Networks, Advanced Operating Systems, Cloud Computing

B.E. Electronics and Communication
Sri Venkateswara College of Engineering, Anna University
Aug 2020 – May 2024 | GPA 8.23 / 10
Object-Oriented Programming, Data Structures

CERTIFICATIONS

The Joy of Computing using Python
NPTEL | Jan – Apr 2023

Programming in Java
NPTEL | Jul – Dec 2023

WORK FOCUS

- Full-stack web (4)
- Cloud serverless (2)
- ML and data (2)
